First Class Cosmetology School

What do you want to do with the rest of your life???

REALLY?! I'm sure by now you are so sick of being asked this question, and really the truth is you have no idea!! For many of you your path will undoubtedly start out with a 4-year university, but there are even more of you out there that wake up at night in a cold sweat thinking about 4 to 6 more years of school! The field of Cosmetology and the industry of beauty culture has been steadily increasing in revenue sales and job opportunities for decades, however fewer and fewer individuals are following their dreams and pursuing careers in the industry. Often families and counselors steer "kids" away from the industry because of the myth that "you can't make any real money" or "you won't be able to support yourself". Although those can be valid concerns going into any new career, this industry has very solid earning potential that is often unseen. Many Salon Professionals become independently employed which affects income reporting to the IRS, making inaccurate earning statistics. Also tips are typically not reported as income, also affecting the numbers that are reporting the IRS. With beginning any NEW CAREER you will have building years, you will start an entry level position, but the earning potential of an experienced salon professional is between 40K-60K not including tips and gratuities! You can be done with school, licensed and working, gaining the experience to get where you need to be in less than a year! #lovewhatyoudo

HOW TO EARN A SCHOLARSHIP WITH FCCS
